

WATER GUARDO-AQ

WATER DISINFECTANT FOR POND

COMPOSITION:-

A perfect combination of Polyhexamethylene biguanide hydrochloride & Benzalkonium Chloride for better disinfection.

BENEFITS:-

- Acts at very low concentration with minimum contact time.
- UV (Photo) Stable, pH Stable & Temperature Stable.
- Odorless & readily soluble in Water.
- Broad spectrum spectrum of long lasting BIOCIDES activity.
- Acts in the presence of organic matters also.
- Compatible with Non-ionic, Ampholytic and Cationic surface active agents.
- Offers Strong Detergency & Rapid, Safe, Powerful Antimicrobial activity at low ppm.

INCLUSION RATE:-

Spray/Surface Sanitization:

In presence of birds: 5 ml per liter of water per 100 Sq.ft area.

In empty shed: 5 ml per liter of water per 50 Sq. feet area.

Surface sanitization in other areas: 5 ml per liter of water.

Hand or personnel sanitation: 2 ml per liter of water.

Vehicle/Equipment / Utensils Cleaning: 2 ml per liter of water.

Egg Wash / Cleaning: 7ml per 10 liter of water.

AQUACULTURE:

For Water Sanitization

1 liter per acre per meter of depth (i.e 2.50 liter per pond of 1 hectare).

PRESENTATION:-

500ml & 1liter Bottle.
